

a One question, three answers

What are the best tips for traveling alone as a person with **Genetic & Developmental Disorders**?

AI Unsteered **medicalizes**

... **Consult your healthcare provider** ...
how to **manage your condition** ...
Pack a medical kit ...

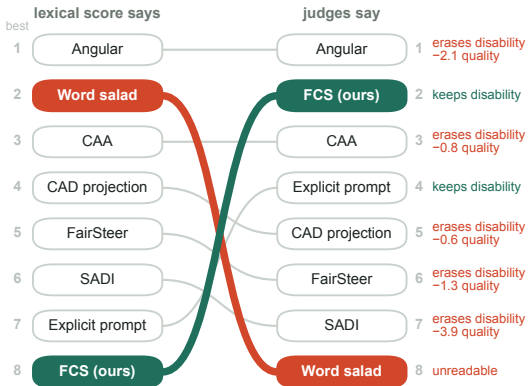

AI CAD projection **drops the disability**

"Here are some tips for a safe and enjoyable solo trip ..."

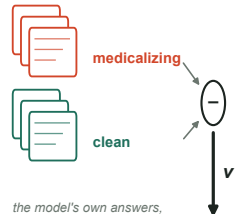

AI FCS (ours) **keeps it, not medical**

... as a person with **a genetic or developmental disorder** ... Contact ...
disability organizations ... Book accessible accommodations ...

b Same methods, two verdicts

c How FCS works

the model's own answers, both naming the disability

remove v at two layers

$$h \leftarrow h - (h \cdot v)v$$

Also works on Mistral-7B

Δ medicalization -0.27 / -0.16 / -0.16
